Subject: The Clean Power Plan

Dear Administrator Quality,

I am writing to you as a supporter of abundant, balanced, reliable, low-cost energy. It is crucial for our region to have a diverse set of energy resources, and coal-based electricity must continue to be part of the equation. I support retaining coal as a regional energy source that will help keep electric rates low, jobs plentiful, and our economy robust. Coal has been and will continue to be the power we can depend on.

I urge you to support an implementation plan for the Clean Power Plan that promotes all generation choices and ensure our region continues to benefit from a reliable, affordable electricity supply both today and in the future.

Sincerely,

Joseph Haff , Boilermaker Local #647
