

Claim your space – buckle in the back

Kids younger than 13 should always
ride buckled up in the back.

✓ Traffic fatalities are **more than double** for children ages 8 to 14 than for younger children.

✓ Children are **40% more likely to be injured** in a front seat than if they had been buckled in the back.

Parents –
Kids do what you do.
If you buckle up, they are
more likely to do the same.
